Intensive and Critical Care Nursing (1993) **9**, 284–285
© Longman Group UK Ltd 1993

Subject index

A

Antibodies, monoclonal, 24
Anxiety in coronary care unit, measurement, 195
Apheresis, LDL, 62
Asthma, severe persistent, patient needs in, 28
Axillary vs rectal and pulmonary artery blood temperature measurement, 21

C

Cardiopulmonary bypass, delirium following, 269
Children (critically ill)
  endotracheal suction, 48
  holistic care, 108
Collaboration, ethical issues concerning, 1
Communication, 215
  cross-cultural, 263
  with ventilator patients, 40
Computerised care plans, nurses' attitudes to, 242
Core temperature measurement, 217
Coronary care unit
  anxiety in, measurement, 195
  empathy and technology in, 55
Cultures, communication between people from different, 263

D

Death (patient's)
  near-, experience of, 157
  informing visitors of, 2
Decision-making, ethical, 191
Declaration of Madrid on preparation of critical care nurses, 142
Delirium, post-pump, 269

E

Empathy and technology in coronary care unit, 55
Endotracheal suction
  for adult non-head injured patients, 274
  for children, 48
Enteral feeding for ventilated patients, 171
Ethical issues
  awareness of, 215
  concerning right to refuse treatment, 82
  decision-making as an, 191
Ethylene glycol poisoning, 183
Eye care for ventilated patients, 137

F

Family, breaking news of patient's death to, 2

H

Haemodynamic profiles, 11
Haemofiltration, 95
Heart failure, ventricular assist devices in, 17
Holistic care of critically ill child, 108

I

Informing visitors of patient's death, 2

K

Kidney failure, acute, management, 237

L

LDL-apheresis, 62
Lecturer practitioner role, 232
Lipoprotein, low density, apheresis, 62
Low density lipoprotein-apheresis, 62

M

Madrid declaration on preparation of critical care nurses, 142
Massage with critically ill patients, benefits, 116
Mentor role in teaching, 152
Monoclonal antibodies, 24
Mouth care, 246
Myocardial infarction, acute, social support and social network after, critically ill male patient's needs/choice/motives concerning, 88

N

Near-death experience, 157
News of patient's death to visitors, breaking, 2

O

Oral, care, 246
Organ transplant purposes, elective ventilation for, 122

P

Poisoning, ethylene glycol, 183
Post-pump delirium, 269
Preceptor role in teaching, 152
Pre-operative visits by ITU nurses, recommendations for implementing, 253
Pressure area
  risk calculator, application, 226
  scoring system, development, 146
Pulmonary artery blood vs rectal and axillary temperature measurement, 217

Pressure area
  risk calculator, application, 226
  scoring system, development, 146
Pulmonary artery blood vs rectal and axillary temperature measurement, 217

Q

Quality assurance model applied in critical care, 177

R

Rectal vs axillary and pulmonary artery blood temperature measurement, 217
Refusing treatment, ethical issues concerning, 82
Relatives, breaking news of patient's death to, 2
Renal failure, acute, management, 237
Role(s) (in general)
  lecturer practitioner, 232
  mentor and preceptor, 152
  of nurses and technicians in ICU, 67

S

Sleep and the ICU patient, 129
Social support and social network after acute myocardial infarction, critically ill male patient's needs/choice/motives concerning, 88
Status asthmaticus, patient needs in severe, 28
Surgery, ITU nurse visits before, recommendations for implementing, 253

T

Teaching in critical nursing
  lecturer practitioner role in, 232
  mentor and preceptor roles in, 152
Technicians in ICU, role, 67
Technology and empathy in coronary care unit, 55
Temperature, core, measurement, 217
Transplant purposes, elective ventilation for, 122

V

Ventilated patients
  communication process with, 40
  enteral feeding for, 171
  eye care for, 137
Ventilation, elective, for transplant purposes, 122
Ventilator observations, overview, 201
Ventricular assist devices in heart failure, 17
Visiting, intensive care, issues in, 75
Visitors, breaking news of patient's death to, 2
